Protocol if student/staff contracts Covid 19				
1. Quarantine beginning and ending will be determined by school officials and the proper local health officials when necessary				
2. Once an individual student or staff member (or member of their household) is tested for COVID-19, any students or staff members in that household will stay home until determined by school officials				
3. After getting positive test results - conduct contact tracing for individuals who test positive (to be done by school officials and proper health officials, when necessary)				
4. School will remain open while contact tracing is conducted, unless and until otherwise jointly agreed by school and health officials				
5. Students and staff members who have an individual in their household test positive will be expected to follow quarantine guidelines determined by the school and health officials				
6. While individual students are quarantined, they will be expected to do synchronous learning with the rest of their class via Zoom/other technology				
7. These individuals will be readmitted to school upon guidance from our school nurse (308-536-2431) and health officials.				
The school board grants the superintendent the authority to adapt and alter these plans as deemed necessary in consultation with board president.				
Screening Question to ask: (example) Do you feel sick?				
Guest entry: screened outside of building/no entry to classrooms/masks
